

WOMEN IN ENERGY- ICELAND

Elevating Women in a Male-Dominated World

Nanna Baldvinsdóttir, Vice Chairman

October 31, 2019

Women in Energy Iceland was founded in
January 2016.

The objective is to empower women in energy, strengthen the connection between them and encourage women to seek education related to energy.

Our ultimate goal is to make the association
unnecessary!

Women in Energy – Iceland is open to all genders as we see a common interest of the objectives being reached.

What tools do we use?

Biannual report published on the influence of women in the power and utilities sector in Iceland.

The report is made in cooperation with Ernst&Young, who also publish an international report on the same topic.

Main findings

What effect does gender balance have on decision making in the energy sector?

Ernst&Young made a reasoned opinion in the report that there was a relation between the diversity of Boards and the Return on Equity

Biannual survey on women's experience in
the sector
